IT-300 Image Express

**Speed/Efficiency/Revolution/
Economic**

the innovated patent design of IT-300 HDD duplicator combines the both advantages of easy to use and professional function. The friendliest professional IT300 offers the fastest working speed, auto power control and three type of duplicator mode to highly satisfy your various kinds of needs.

Ultra high speed

With up to 100 MB per second transfer bandwidth, this is the fastest speed of industrial use HDD duplicator. Each SATA interface is independent, no matter 1 target or 15 target duplication, it has same speed performance. 6GB per minute is far beyond PC software based duplicators.

Auto power control system

When copying finished, the machine will automatically cut off the power of each port to protect HDD during removal from the duplicator. The power of each port will be only be output when the operation is started.

Revolutionary interface module

This patent design has 4 most customer appreciated advantages:

- Easy Plug and copy. No need of manual cable connection on each HDD. Just slide in the HDD into each interface module and ready to copy. It greatly reduces the operation time of cable connection.
- Both 2.5" and 3.5" SATA co-exist without requiring additional adapter or manual change interface cable.
- SATA, IDE (2.5, 3.5) & SATA SSD. The machine equipped with standard SATA interface, and also provide optional interface module for IDE, SSD
- Easy replaceable interface can alleviate the hassle of change the wearing interface.

Support 3 kind of different duplication mode

Quick copy, partition copy and whole HDD copy. If you have a big capacity 2TB HDD which only has 200GB data inside, quick copy can help to reduce the duplication time from 5.6 hours to 33 minutes. It will not copy the empty space.

Support various format on quick copy

Quick copy on standard HDD formats of FAT, NTFS, Linux. If an unknown OS besides FAT, NTFS, Linux, the machine will automatically do partition copy.

DoD erase function

Comply with US Department of Defense standard of clearing and sanitizing. It is important to make sure the data inside the disregard HDD not to be retrieved and protect the HDD can be safely transferred.

Duplication among different capacity HDD

The duplicator allows different capacity HDD to copy each other. If a smaller source HDD copy to larger target HDD, after duplication, the untouched space is allowed to repartition for further use.

Ultra high speed data Compare

the very special hardware bit by bit compare is the most secure way to guaranteed 100% accuracy of data duplication. Also, it takes the same speed as copy, there is no other duplicator can do such performance so fast and accurate.

Easy and friendly user interface

Very Simple and easy to use. Don't require for high level expertise of operation.

Specification

Model Number	IT-300
Model Name	HDD Duplicator
HDD Interface	SATA, IDE(optional)
Compatible HDD	All major brand of 2.5", 3.5" and SATA SSD
Duplication mode	Data Only quick copy, All partition Whole disk copy
Support formats	All format.
Data only support formats	FAT, NTFS, Linux
Capacity	Maximum to 2TB
Dimension	31*19.5*6.5 cm
Weight	
Power	
Safety
