

uSATA Controller Introduction

1. uSATA DVD Controller face plate

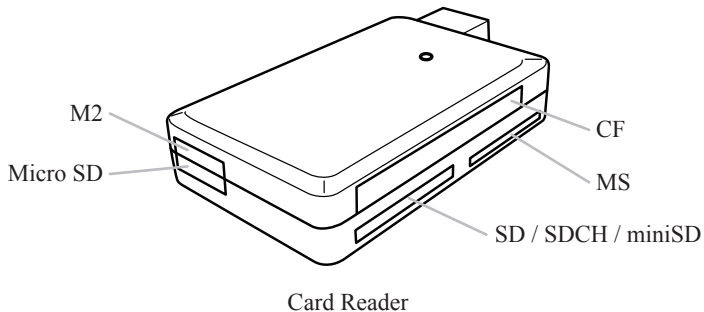

2. uSATA DVD Controller key features:

- (1) USB copy to Disc
uSATA can use USB copy key directly copy USB to CD/DVD/BD disc.
- (2) 2 DVD Fast key operation
The Fast Keys default setting are “Select source” and “Eject All Disc”.
- (3) Same operation as the SATA DVD duplicator controller
uSATA duplicator has exactly the same function and operation as normal SATA DVD duplicator.

3. Specail Reminds

- (1) uSATA controller can use a USB converter to copy other different types of flash cards, such as CF, SD, MicroSD or Memory stick. However, it is strongly recommended to use manufacturer approved USB converter. If you use a bad compatible or poor quality USB converter, it may cause incompatible copy result or cause damage to uSATA controller.

(2) When USB data size is bigger than disc size (such as CD 640MB, DVD 4.7GB, BD 23GB), the uSATA will not copy the USB to disc.
